

Have you been affected by groundwater flooding?

We have developed a number of new flood warning areas for communities at risk from groundwater flooding. These complement our existing flood alert areas. We are working with communities to promote these warning areas and recruit people to sign up for our Flood Warnings Direct service.

How can I sign up to receive these flood warnings?

To find out if you are at risk and to register to receive these Flood Alerts and Flood Warnings for groundwater, call Floodline on 0345 988 118 (24 hour service) or go online at www.gov.uk/environment-agency. For more information about the flood warning areas contact the Wessex Flood Resilience team at floodwessex@environment-agency.gov.uk

How we have produced the flood warning areas

For several years we have been able to issue groundwater flood alerts across the area. The three alert areas are the **West of Dorset**, **Cranborne Chase** and **Salisbury Plain**. The flood alert is an early warning about the potential for flooding to occur.

Following the groundwater flooding in 2013 / 2014, we have analysed our records and have produced 22 community based flood warning areas. These cover smaller areas than the flood alerts. A flood warning is used to warn people that flooding of properties is expected.

Where the groundwater flood warning areas are

The Bourne Valley

- The Collingbournes including Aughton, Collingbourne Kingston and Collingbourne Ducis
- The Bourne Valley, north of the A303, including Tidworth and Shipton Bellinger

South Winterborne Valley (this warning area has been in place since July 2012)

- The South Winterborne including Kingston Russell, Winterborne Abbas, Steepleton, Martinstown, Winterborne Monkton, Winterborne Herrington, Winterborne Came, West Stafford

How can I make preparations to cope with groundwater flooding?

- Think and prepare now for what you'll do if flooding occurs where you live, don't wait until flooding happens. The primary responsibility for protecting a property from flooding lies with the householder.
- Consider installing flood protection products such as a pump or improving surface water drainage around your property.
- If you have a pump ensure it is serviced and working effectively.
- Have a personal flood plan which list key information, contacts and actions to help you cope with flooding.
- Move valuables from basements and cellars.
- Keep drains and gullies around your property free of debris.
- Visit the Environment Agency website for local water levels and flooding information www.gov.uk/environment-agency
- If you own part of the river bank you should keep the banks and bed of the river clear of debris.
